

Explore Parts of a Group

You can use counters to find a part of a group.

Suppose you have 20 counters. You want to find $\frac{2}{5}$ of 20 counters.

The denominator tells you how many equal groups to make. Divide the 20 counters into 5 equal groups.

There are 8 counters in 2 groups.

So, $\frac{2}{5}$ of 20 is 8.

Complete. Circle the part of each group.

1. $\frac{1}{2}$ of 8 = _____

2. $\frac{2}{5}$ of 10 = _____

3. $\frac{1}{3}$ of 6 = _____

4. $\frac{2}{3}$ of 15 = _____

5. $\frac{3}{4}$ of 12 = _____

6. $\frac{1}{4}$ of 20 = _____

7. $\frac{1}{6}$ of 30 = _____

8. $\frac{5}{6}$ of 18 = _____

9. $\frac{4}{5}$ of 10 = _____
