

Temperature: Fahrenheit and Celsius

Temperature is measured in degrees Celsius ($^{\circ}\text{C}$) or in degrees Fahrenheit ($^{\circ}\text{F}$). Compare the two scales shown below.

Write the temperature in degrees Celsius ($^{\circ}\text{C}$) and degrees Fahrenheit ($^{\circ}\text{F}$).

Circle the letter of the correct estimate.

- | | | |
|---------------------------------------|--------------------------|--------------------------|
| 5. the temperature of cold water | A. 10°C | B. 10°F |
| 6. the temperature of warm water | A. 100°C | B. 100°F |
| 7. the temperature of a fever | A. 39°C | B. 39°F |
| 8. room temperature | A. 70°C | B. 70°F |
| 9. temperature at an outdoor ice rink | A. 20°C | B. 20°F |
| 10. temperature on a hot beach | A. 30°C | B. 30°F |
| 11. comfortable outdoor temperature | A. 10°C | B. 10°F |
