Measuring and Estimating Angles

Practice

Estimate the measure of each angle. Then use a protractor to check your estimate. Trace the angle and draw longer sides if necessary.

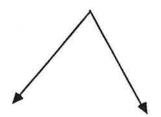

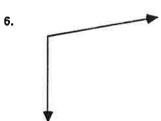

2.

4.

5.

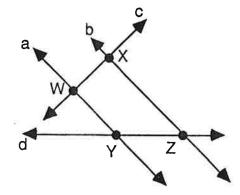

7. Use a protractor to draw angles with measures of 60°, 90°, and 140°.

Mixed Practice

Use the figure below for exercises 8-12.

- 8. Name a pair of parallel lines.
- 9. Name a pair of perpendicular lines.
- 10. Name a pair of intersecting lines which are not perpendicular.

11. Name the point where a intersects d.
