Division Properties**Practice**

Ring any problems which cannot be solved. Give the quotients for the others.

1. $9 \div 1 = n$

2. $16 \div 8 = n$

3. $0 \div 8 = n$

4. $7 \div 0 = n$

5. $0 \div 3 = n$

6. $28 \div 7 = n$

7. $1 \div 1 = n$

8. $14 \div 2 = n$

9. $0 \overline{)11} = n$

10. $7 \overline{)49} = n$

11. $9 \overline{)63} = n$

12. $5 \overline{)5} = n$

Solve. Check your answers by undoing the division with multiplication.
Show your work.

13. $56 \div 8 = n$

14. $24 \div 6 = n$

15. $81 \div 9 = n$

16. $30 \div 5 = n$

17. $36 \div 9 = n$

18. $28 \div 4 = n$

19. $12 \div 2 = n$

20. $0 \div 8 = n$

21. $35 \div 5 = n$

Mixed PracticeSolve. Check your answers by undoing the subtraction with addition.
Show your work.

22.
$$\begin{array}{r} 11 \\ -6 \\ \hline \end{array}$$

23.
$$\begin{array}{r} 14 \\ -8 \\ \hline \end{array}$$

24.
$$\begin{array}{r} 10 \\ -3 \\ \hline \end{array}$$

25.
$$\begin{array}{r} 17 \\ -9 \\ \hline \end{array}$$

Find the sums by adding down. Add up to check your answers.

26.
$$\begin{array}{r} 7 \\ 3 \\ +4 \\ \hline \end{array}$$

27.
$$\begin{array}{r} 2 \\ 9 \\ +5 \\ \hline \end{array}$$

28.
$$\begin{array}{r} 1 \\ 8 \\ +6 \\ \hline \end{array}$$

29.
$$\begin{array}{r} 3 \\ 6 \\ +0 \\ \hline \end{array}$$
