Dividing: 3-Digit Quotients**Practice**

Divide and check. Show your work.

1. $472 \div 3$ 2. $846 \div 5$ 3. $327 \div 2$ 4. $958 \div 6$ 5. $608 \div 4$

6. $7 \overline{)919}$ 7. $4 \overline{)571}$ 8. $8 \overline{)957}$ 9. $2 \overline{)294}$ 10. $6 \overline{)789}$

Mixed Practice

Estimate each answer. Then solve.

11. 42×37 12. 86×28 13. $516 - 294$

14. $971 + 405$ 15. $380 - 126$ 16. $683 + 577$

Mixed Applications

17. On a trip, Erica, Andrea, and Gemma stopped 3 times for gas. They paid \$8.16, \$9.40, and \$3.44. If they split the cost evenly, how much did each person spend for gas?
18. Eugene took 6 rolls of film at camp. There were 36 pictures on each roll. 13 did not come out. How many of Eugene's pictures came out? 203 If he divides them among himself and 9 friends, about how many will each person get?
