

Name _____

Divide by 1-Digit Divisors

Divide.

1. $4 \overline{)324}$

2. $6 \overline{)410}$

3. $7 \overline{)256}$

4. $8 \overline{)384}$

5. $3 \overline{)843}$

6. $4 \overline{)850}$

7. $8 \overline{)437}$

8. $6 \overline{)1,743}$

9. $8 \overline{)2,117}$

10. $7 \overline{)2,349}$

11. $5 \overline{)2,443}$

12. $3 \overline{)1,196}$

13. $2 \overline{)1,847}$

14. $4 \overline{)3,870}$

15. $5 \overline{)1,234}$

16. $4 \overline{)5,072}$

17. $43,064 \div 6 =$ _____

18. $13,893 \div 6 =$ _____

Problem Solving

19. A marsupial mole has a mass of about 60 grams. The cus cus has a mass about 60 times as great. What is the mass of the cus cus in grams? _____

20. A wombat weighs 37,448 grams, a kangaroo weighs 63,582 grams, and a Tasmanian devil weighs 10,854 grams. Estimate their total weight, to the nearest hundred grams. _____

Spiral Review

Estimate the sum.

21. $37.4 + 73.6$ _____

22. $1.68 + 0.76$ _____

23. $2,842 + 18$ _____

24. $1.187 + 4.753$ _____
