Skills: Division with 2-Digit Quotients

Practice
Divide and check. Show your work.

1. $3\overline{)98}$ 2. $5\overline{)88}$ 3. $7\overline{)29}$ 4. $4\overline{)45}$ 5. $8\overline{)63}$

Estimate each quotient. Then divide. Was your estimate reasonable?

6. $25 \div 4$ 7. $99 \div 5$ 8. $49 \div 6$ 9. $77 \div 2$ 10. $87 \div 8$

Mixed Practice
Estimate each answer. Then solve.

11. 70×30 12. 40×24 13. 83×11 14. $415 + 44$ 15. $167 + 551$

16. $270 - 135$ 17. $931 - 183$ 18. 24×49 19. 81×56 20. 61×99

Mixed Applications

21. It takes about 120 liters of water to wash one load of laundry. If four loads of laundry are done each week, how many liters of water are used to do laundry in one year?

22. The Smiths have a water bill of $15.92 for the month of February. About how much did they spend for water each week?
