

Tonight's homework: On a separate sheet of paper, re-do the problems you missed on the Chapter 2 test. If you didn't miss any or very few, choose five new problems to do. (Everyone is required to complete at least 5 problems.) Challenge: Solve # 22-25 and use pictures, numbers, and words to explain your answers.

Chapter Test

Add or subtract. Check each answer.

1.
$$\begin{array}{r} 911 \\ -567 \\ \hline \end{array}$$

2.
$$\begin{array}{r} 4,077 \\ +3,574 \\ \hline \end{array}$$

3.
$$\begin{array}{r} \$6,000 \\ - 3,096 \\ \hline \end{array}$$

4.
$$\begin{array}{r} 448,392 \\ +171,655 \\ \hline \end{array}$$

5.
$$\begin{array}{r} 339 \\ +784 \\ \hline \end{array}$$

6.
$$\begin{array}{r} \$78,436 \\ + 38,215 \\ \hline \end{array}$$

7.
$$\begin{array}{r} \$76,115 \\ - 48,325 \\ \hline \end{array}$$

8.
$$\begin{array}{r} 856,034 \\ -241,855 \\ \hline \end{array}$$

9. $\$678.99 + \45.53

10. $619,332 - 428,445$

11. $\$784.90 - \25.79

12. $730,117 + 53,907$

Add or subtract mentally.

13. $47 + 52$

14. $303 + 176$

15. $900 - 600$

16. $838 - 317$

Estimate.

17. $827 + 378$

18. $4,644 + 3,822$

19. $916 - 449$

20. $5,611 - 3,488$

Solve.

21. Renee scored 167, 98, and 156 in three games of bowling. About how many points has she scored?

22. Yoshi collects baseball cards. He has 1,006. He put 389 cards into a baseball album. How many cards are not in the album? Write a number sentence.

23. Megan bought a paint set for \$13.95, paintbrushes for \$7.29, and an easel for \$11.69. She paid for them with 2 twenty-dollar bills. What was her change?

24. Three students played a video game at an arcade. One student scored 4,671 points. Another student scored 3,057 points. Another scored 1,178 points. They need 10,000 points to win a prize. How many more points do they need?

25. A basic train set costs \$115.98. Each additional car costs \$18.59. Mr. Green wants to get a basic train set and 3 additional cars. He has \$200.00 in his budget for hobbies. How much money will he have left over?
